Campaigns / Events
Segments / Lists
Expenses & Sales
oh my

Lee Michaels

Mark Lappin
Director of Information Technology

About Lee Michaels Jewelers

- Founded: 1978 Headquarters: Baton Rouge, LA
- Current Stores Count: 9 stores, E-Commerce / Internet,
 Corporate Gifts
 Headquarters
 Manufacturing
- On Adaptive: 2 Years + 3 weeks
- CRM initiatives launched 2014 on ASC, evolved further in Adaptive, considered critical activities.

Campaigns – More than Marketing

- What do we (Lee Michaels) consider events
[**Campaigns**]
- Lee Michael's plan to use Campaigns to **track expenses** and **track revenue** for *most* company events, even those that are not sales floor focused.
- Lee Michael's prior activities with event management, dynamic company event calendar and how it ~~is moving~~ has moved to Business Central.
- Multi-Department campaign / event management involvement.

Session Targets:

- System Admin / Operations
- Accounting / Finance
- Sales Floor / Sales Staff
- Reporting / Power BI
- Marketing / Business Development

Terminology:

- **Campaign:** Adaptive construct / object.
- **Segment:** for this presentation, segment is “just a list”
- **Event:** user vernacular, Mark will use event and campaign interchangeably. User focused will say event, tech focused will say campaign.

Getting Started

- Prerequisites: Adaptive's BC Apps.
- Represents the Lee Michaels decision framework and initiative as of summer 2026 paired with long term technology objectives several *years* of “find a better way”.
- Lee Michaels utilizes multiple complimentary technologies with Business Central *in partnership* with Adaptive. Today demonstrates a wholistic concept.

Wait – Dimensions ? ! ?

- Most Likely – Global Dimension 1 is already in use on your system even if one store.
- “Tags” added to transactions in Business Central for analysis and reporting.
- “Multiple Where” does the transaction belong or what was it for **without** creating additional general ledger accounts. Think “extra grouping objects”
- For Lee Michaels:
 - G/L account no: What is the actual *accounting classification* of the expense
 - Dimensions: Store (1), Initiative (2), Campaign (3)

Please review with your Adaptive Consultant impacts to your system !

Dimensions Extra - #1

Dimensions are Tools for Analysis and Controlling

Dimensions flow from Master Data to Documents to
posted Documents to Ledger Entries

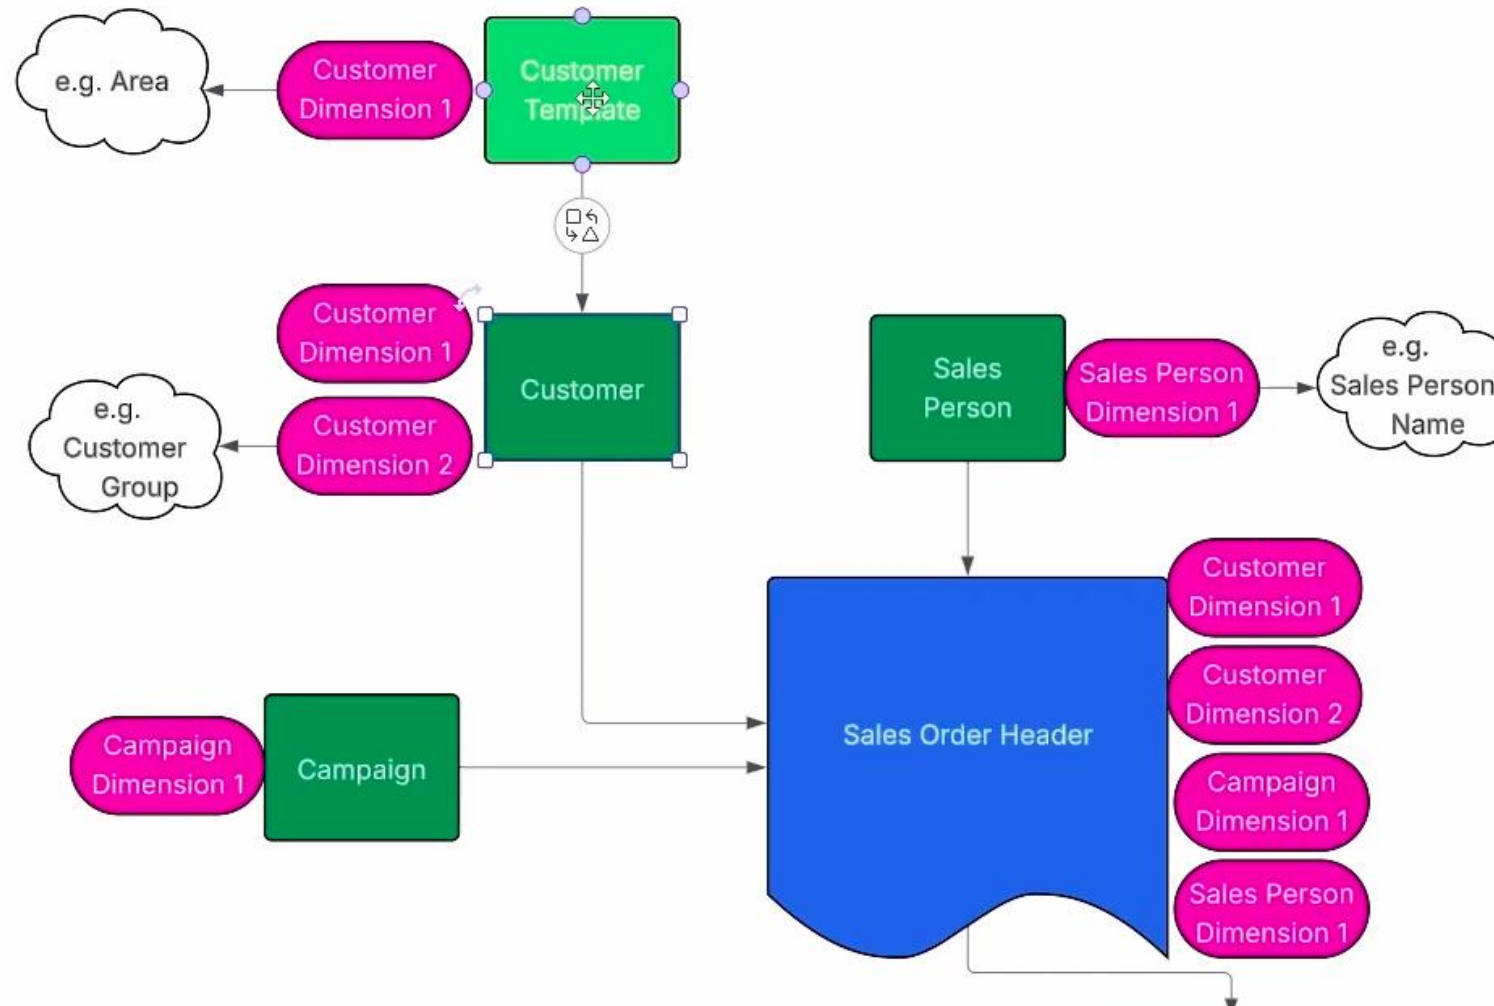

think of
them as
hashtags

Dimensions can then be used to filter Financial
Reports and Ledger Entries

Source: Dominique Collins – 8/15/2026 via e-mail

Dimensions Extra #2

Sales

Scheduling • Communication monitoring • System guidance

Accounting

After the fact • Scheduling • Expenses

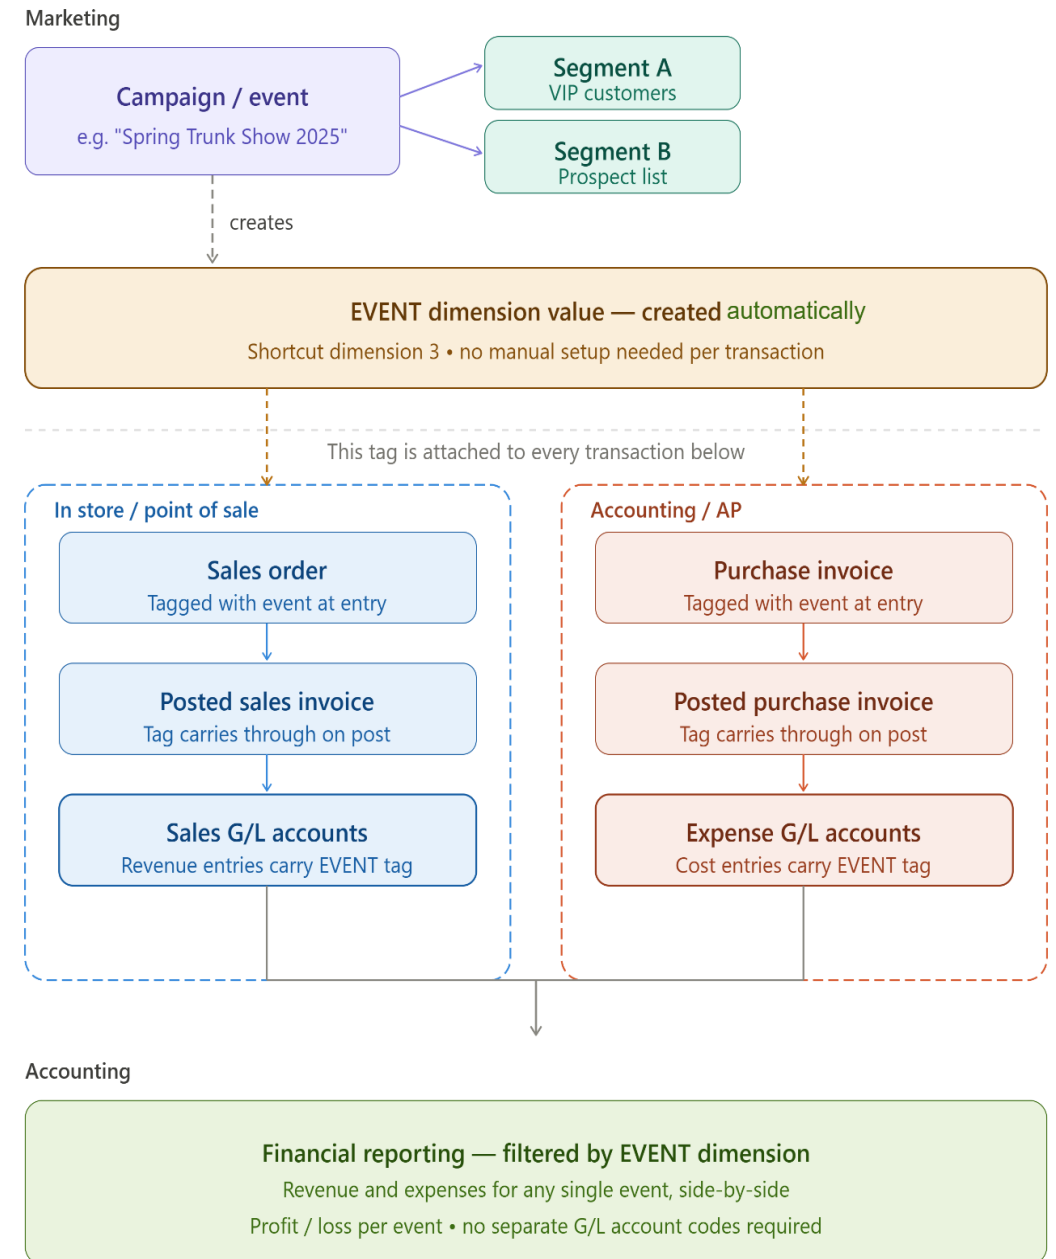

Technology

System Configuration • POS Setup • Orchestration

Total Vision

One Management Platform	- Marketing, Training, Accounting, Merchandising - Single Source of Truth
Manual Lists are OUT	CRM (Redbook) managing segments with campaigns
Tracking	- Eliminate manual sales tracking - Eliminate manual customer tracking - Eliminate manual event expense tracking
Review	- Event ROI - Customer Penetration - What Customers are “Over Invited”

Caveat: Lee Michaels is NOT directly interfacing Campaigns & Segments to Klavio...yet.

1st Discussion: Dimension Use

Re: [#12237319] lee michaels25> rename dimer

MS

Mikhail Smirnov <lmfj@adaptivenav.com>
To: 🇷🇺 Mark A. Lappin

📘 This sender lmfj@adaptivenav.com is from outside your organization.

📅 You replied to this message on 6/5/2026 10:44 AM.

Hello

Yes you can rename and yes out of business hours,

Regards

😊

--

Mikhail Smirnov
lmfj@adaptivenav.com

1st Decision: Dimension Use

Department (Dimension 2) → Initiative

*Expenses that are not tied to a specific point in time event but we want to collect under one umbrella while maintaining respective general ledger / account coding for **accounting things**. Examples:*

- *Employee Training & Education: {Travel, Auto, Air, Hotel, Meals all hit their own G/L}*
- *Other Lee Michaels internal programs that span multiple G/L accounts*
- *But what about “all events of X type”*
 - *We will use an attribute on Campaigns (Events) and when the PowerTeam catches up, build those in PowerBI. We do not want to complicate general ledger or cause lots of extra work.*

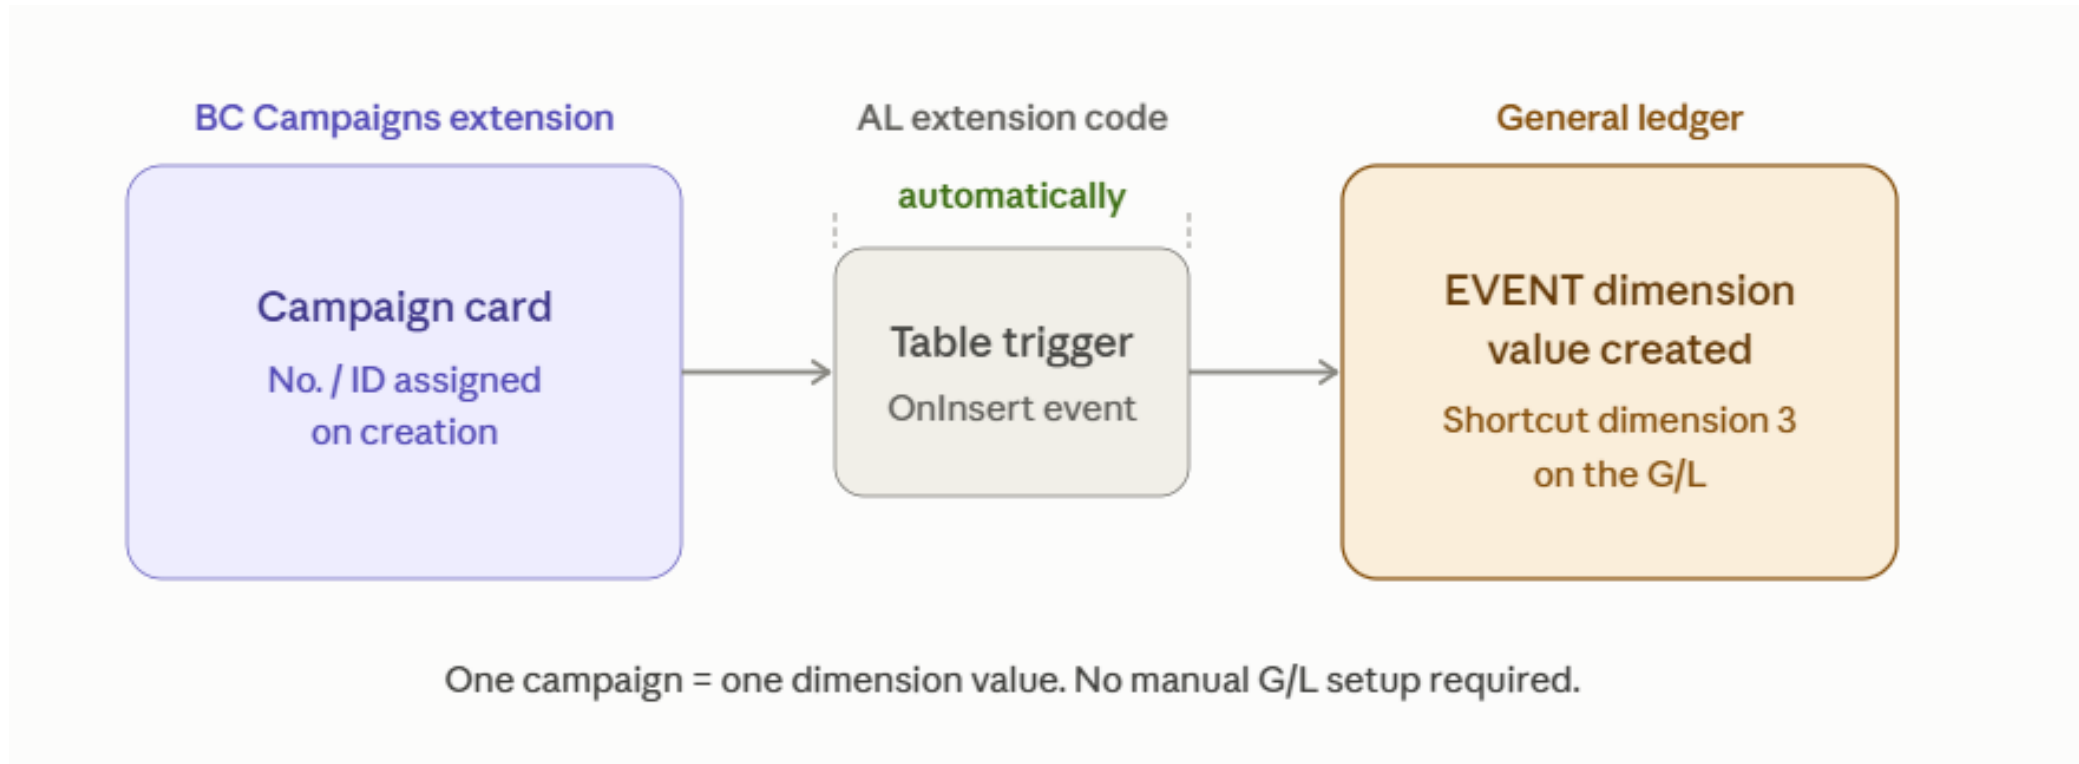

Shortcut Dimension 3 → EVENTS

Specific, time/date driven “things” that have definitive start and finish where we want to track everything back to this specific point in time. Such as:

- *A trunk show*
- *A meeting with travel*
- *Company inventory*

Campaigns / Events will NOT just be for “selling” or “client only” activities. They ARE our event calendar with all associations.

Technical Challenge: HOW ?

The screenshot shows a web application interface for configuring 'AJE General Attributes'. At the top, there's a title bar with a back arrow, the title 'AJE General Attributes', and icons for bookmark, share, and refresh. Below the title bar is a toolbar with icons for search, add, edit, delete, and a 'More options' dropdown. The main content is a table with the following columns: 'Attribute Type ↑', 'Attribute Name', 'Attribute Short Name', 'Auto Attribute Type', 'Edit... on Item Card', and 'AI API URL'. The table contains 15 rows of attributes, each with a unique name and type, and a checkbox for editing on the item card.

Attribute Type ↑	Attribute Name	Attribute Short Name	Auto Attribute Type	Edit... on Item Card	AI API URL
Vendor Attr 03	Class (Accounting)		Manual	☐	
Segment Bool Attr 01	API App: Allow Read		Manual	☐	
Segment Bool Attr 02	API App: Allow Modify		Manual	☐	
Segment Bool Attr 03	API Finalized / Locked		Manual	☐	
Segment Date Attr 01	API Start Edit Date		Manual	☐	
Segment Date Attr 02	API End Edit Date		Manual	☐	
Campaign Attr 01	Event Type		Manual	☐	
Campaign Attr 05	Brand/Vendor Focus		Manual	☐	
Campaign Bool Attr 01	All Day Event		Manual	☐	
Campaign Bool Attr 02	Outbounding Required (On = Y...		Manual	☐	
Campaign Bool Attr 03	Hidden on Calendar		Manual	☐	
Campaign Bool Attr 04	Do Not Display on Comm Site ...		Manual	☐	
Campaign Date Attr 01	Outbounding Start Date		Manual	☐	

Not sure if this is in the general release, or if this is the Lee Michaels PTE.

Request includes adding fields to DimCampaign in PowerBI. With transition, expect not to see these until FabricModel.

Result: Campaigns (Events) → GOOD!

POS

Store No.	14 ▼	Enable On POS Within Dates	☒
----------------	------	----------------------------------	-------------------------------------

Tip:

- Make a data map as you go. Similar to other general attributes, PowerBI (and API) will show the field name and not your friendly name.

Easy to get lost and interpret data incorrectly without consistent naming.

Setup: Segments General Attributes

- 10 Boolean attributes
- 5 date attribute fields
- 5 configurable text fields around 100 characters
- 1 “long text” field we could use for extended descriptive information

Adaptive Ticket: 12235198

Not sure if this is in the general release, or if this is the Lee Michaels PTE.

ACCOUNTING: With the trigger, these add automatically(you might want to turn old ones off though).

Prepare Accounting: Outside Expense Sources

The screenshot shows the SAP Concur 'Advertising - Digital Media' expense entry form. The form includes fields for Transaction Date (08/05/2026), Business Purpose (RSVP Domains - Holiday Events), Vendor Description (CLOUDFLARE), Payment Type (Capital One MasterCard Corporate Card CBCP - US), Amount (41.84), Currency (US, Dollar (USD)), Location (098 - Corporate), Invoice Number (IN-74200129), Vendor Name ((8856) CloudFlare), and Initiatives. A search for 'Baton Rouge - BOC - CP3087 - 2026-08-...' is shown in the EVENTS dropdown. The form also has a 'Save Expense' button and a 'Comment' field.

The screenshot shows the search results for the 'Baton Rouge - BOC - CP3087 - 2026-08-...' query. The results list two events: 'Baton Rouge - BOC - CP3086 - 2026-08-28 - Verragio Trunk Show' and 'Baton Rouge - BOC - CP3087 - 2026-08-20 - Penny Preville Trunk'. The search bar shows 'Search by Text' and the results are displayed in a list format.

WAIT – Not Adaptive!

Personnel with company credit cards upload receipts to Concur, and can associate receipts expense type (G/L) and Event or Initiative Dimension.

Using BC API, checking for last changed date of campaign entry, generates file for upload to Concur. Planned fall to do more API interchange with Concur

Ticket: 12357534 – Add new columns to ABS Concur Import after working with concur to add custom user fields to export/integration (configuration).

POS Popup Features

- Enabled **only** on Active on POS Campaign. Non sales events do not show.
- “Sticks” to open orders for later pickup and attribution.
- Permits event change during pickup (start during one event, pick up during another).
- Confirm event at pickup
- *Caution: Entire transaction associated.*

EVENTS Populated on Posted Sales Inv

The screenshot shows a 'Posted Sales Invoice' for 'PS-INV265628 · MARK LAPPIN'. The 'General' section contains fields for No., Customer, Contact, Posting Date, Tax Date, and Due Date, all set to 8/11/2026. A pop-up window titled 'Sales Invoice Header PS-INV265628 - Dimension Set Entries' displays a table of dimension set entries. The table has three columns: Dimension Code, Dimension Value Code, and Dimension Value Name. The first row is highlighted in light blue and contains 'EVENTS', 'CP3066', and 'Store 14 - Vendor Event 2'. The second row contains 'STORE', '014', and 'Bocage'. A red arrow points from the 'Invoice' tab in the main form to the 'Dimensions' button. Another red arrow points from the 'EVENTS' row in the pop-up to the 'Dimensions' button. A third red arrow points from the 'EVENTS' row in the pop-up to the 'General' section of the main form.

Dimension Code ↑	Dimension Value Code	Dimension Value Name
EVENTS	CP3066	Store 14 - Vendor Event 2
STORE	014	Bocage

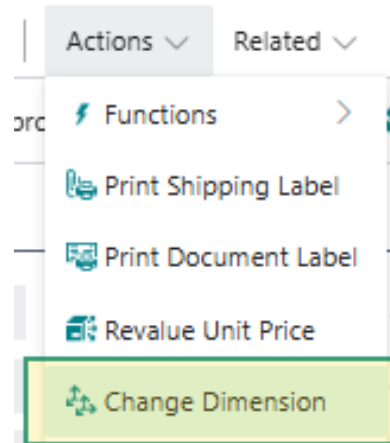

Note: Earlier slide on Campaign creation adds Dimension Value entry. ABS BCApps functionality uses campaign id No. to associate to dimension value. **They must match.** Combination of base BC features and BC Apps *together*.

EVENTS Adding / Modifying

Feedback from Stores *so far*:

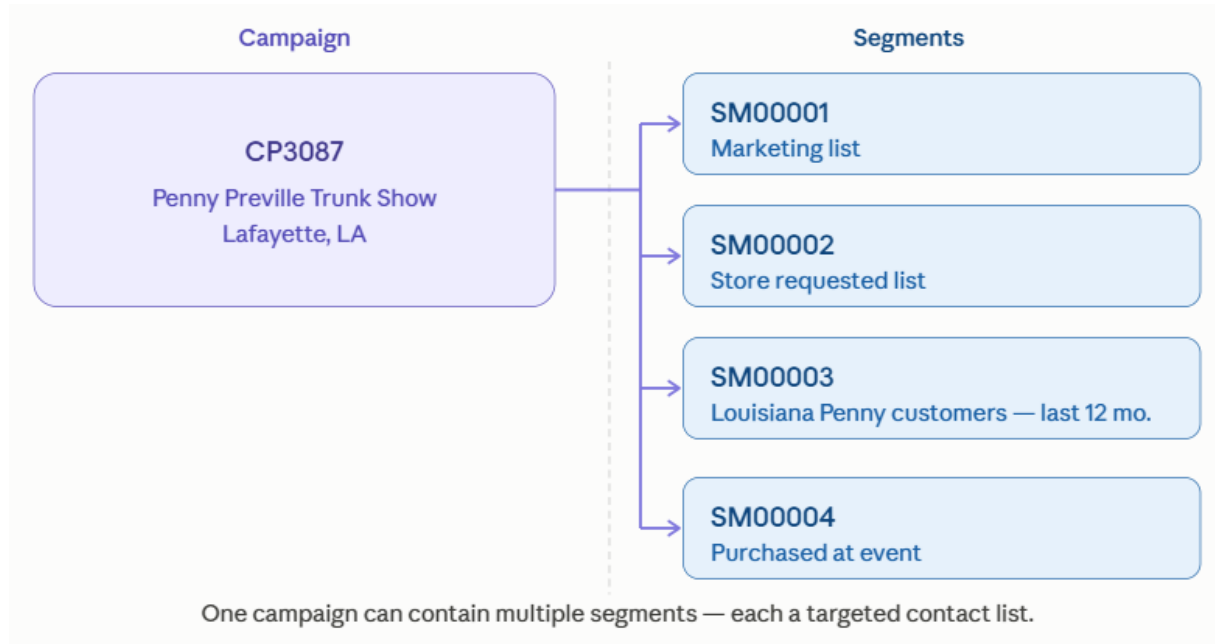

- Easy to use
- Easy to click through popup
- Easy to forget to do

Solution: Backoffice (HQ) – can make adjustments on *Posted Sales Invoice* OR *Sales Order*

A screenshot of the 'AJE Validate Posted Dimensions' form. The form has a title bar with tabs for 'Log', 'Customer', 'Salespersons', 'Commissions', and 'Doc Info Entries'. The main content area is divided into sections: 'Filters', 'Global Dimension', and 'Other Dimension'. The 'Filters' section shows 'Dimension Set ID' as 121 and 'Record ID' as 'Sales Invoice Header: PS-INV270...'. The 'Global Dimension' section has 'Store Code' as 009 and 'Business Initiative' as an empty dropdown. The 'Other Dimension' section has 'Event Code' as CP3087, which is highlighted with a green border. Below this are four 'Shortcut Dimension' fields (4, 5, 6, 7, 8) each with an empty dropdown.
